Requirements for ORR Case [REDACTED]

Following requirements are submitted for Case [REDACTED] who worked as Chief Engineer of Communications under the Ministry of Transportation in the USSR:

25X1X6

- 1) Draw a diagram, showing the major long-distance telephone, telegraph, and radio links operated by the Ministry of Transportation.
- 2) To what extent were these links used for communications by individuals and by agencies other than the Ministry of Transportation?
- 3) List the types of messages which would use one type of communication (such as radio) and not the other two types. What types of messages might use any one of the three types interchangeably?
- 4) What regular types of communication took place on Ministry of Transportation business (such as daily reports of carloadings at a station, transmitted to the division of railroad system office)?
- 5) If an attempt were made to disrupt Ministry of Transportation communications (especially land line communications) for two days or longer, how could it be done? What further measures could be taken to disrupt communications continuously for a month or longer?
